Admission Requirements for Tropical Landscape Architecture Graduate Program

To satisfy the University requirements for admission to a master’s program, applicants must have a Bachelor’s Degree of Landscape Architecture. However, applicants who are holders of degrees other than the aforementioned degree may be accepted but will be required to take additional courses to comply with the requirements for the degree of Bachelor of Landscape Architecture.

Holders of degree in the physical planning professions such as civil engineering and architecture, as well as in botany, agriculture and forestry will have to take additional subjects in landscape design and/or construction upon the advice of the Program Adviser in order to comply with minimum requirements of the Bachelor of Landscape Architecture program of the University of the Philippines.

Degree holders who do not have any subjects in eastern and western cultures shall enroll in equivalent subjects in the University of the Philippines besides those required in the Master of Tropical Landscape Architecture Program. The Program Adviser shall assist the student in preparing his plan of study.

Application Requirements

Applicants must submit the following:
